PRO Pullet

The budget-friendly starter aviary

The PRO Pullet rearing aviary was developed on the basis of suggestions made by longtime layer growers with experience in alternative growing systems. With the same layout of equipment on all levels, the birds find their way around the system very quickly.

The PRO Pullet is available in different widths to achieve the best possible stocking density for any barn floor plan. Fold-out platforms allow the birds to fly to the different tiers which prepares them optimally for floor, free-range or organic egg production conditions. Easy-to-operate sliding doors and sensibly arranged partitions simplify the process of moving birds in and out.

Available in three different widths

For individual retrofitting of existing houses

Sliding doors and foldable balcony for excellent monitoring

Smooth transition to aviary laying system

Easily adjustable

PRO Pullet

Proven rearing aviary for healthy and uniform pullets
